

BE SEMINAR TRAINING

We Are Piece Of The Puzzle

In an age where productivity and bottom line is a “way of life”, it has become even more important to nurture and grow employees that create the culture and add to bottom line success. Study after study after study has shown that happy fulfilled employees add more value to the corporate culture and drive increased bottom line success.

Our business has evolved around these needs of our corporate partners and their employees. This is what we do, we create strong happy people that are fulfilled and live from a place of creativity, not their past.

The result? A happier work life balance, a better corporate culture, stronger relationships, and happier employees that lead to much fuller bottom line success for your company.

Our Company Exists **To Grow** Your Company

The benefits of happy and fulfilled employees are enormous. They are more productive, more creative, better problem solvers, have better relationships, are healthier, have better marriages, are less stressed and enjoy deeper social interaction than the less positive people around them.

BE Seminar Training has invested heavily in its programs and processes which always start from the inside. Happiness is self-created and unhappiness is self-created. Let your team dive into a powerful curriculum and have a learning experience that will change many of their lives and without question raise your bottom line.

We will challenge participants one-on-one to be themselves rather than play a roll that had been imposed on them by the past. Your team will be surprised how both physically and emotionally challenging and how philosophical the training is.

Using this program, you will without question increase the energy of your management and staff, which is a direct reflection of self image which is what motivates us and can be seen as the fuel to our lives.

Be Seminar Training Helps By:

- ✓ Managing the well-being of your employees
- ✓ Advancing your corporate culture
- ✓ Creating sales opportunities that didn't exist before
- ✓ Increasing moral and productivity
- ✓ Enlarging your bottom line profits

Abandoning the Normal Way of Business

From the beginning, we understood that a successful relationship with our corporate partners would require abandoning the normal way of business. To start with, we knew that if we were going to provide a true service, we needed to truly understand the management and employee connection. Bruce and Darren's combined 50 years of experience will take the participants to a new level. **WATCH VIDEO HERE:**

By working in partnership with your company we are able to create fantastic work cultures, and build strong employee relationships that increase sales, inspires confidence and assures reliability.

And our commitment to providing superior corporate support doesn't end there...

Deliver a Rewarding Experience With Every Sale

My ultimate purpose is not to tell them some facts they did not know. I ask them to entertain the possibility that there is something they do know, which they have not been aware that they know. It is not a 'training' in the usual 'rule-learning' sense of the word, nor is it an ingraining, by repetition or any other means, of behaviors, attitudes, or beliefs.

The BE Seminar Training is an opportunity to for participants to have an experience, uniquely their own, in a situation which enables and encourages them to do that fully and responsibly. I am suggesting that the best way to learn about BE Seminar Training is to look into yourself, because whatever BE Seminar Training is about is in your self already. I am just going to let them discover it for the first time.

At BE Seminar Training, we understand the dynamics of human behavior. We will start inside by evaluating pasts and stories about who they are and why they are that way. Once we explore the subconscious mind and learn to control the 1/1,000 of a second where the EGO converts events into your subconscious mind, we are on the path to increased energy.

We Work For You

The critical part of the training is freeing oneself from the past, which is accomplished by "experiencing" one's recurrent patterns and problems rather than repeating them. The word experience is used to mean a process of fully experiencing the pointless repetition of old, burdensome behaviors so you are not run by them anymore.

Our network of relationships with nutritionists, health experts, exercise gurus and a host of well-being aficionados provides the opportunity for your employees to take their growth and transformation a step further if that is what they choose. We have found that once people have realized how great they can become they often yearn for more, which is why we offer full programs in all areas of self-development that are available beyond our initial meeting.

We prioritize the interest of you and your employees over and above everything else.

We Understand Your Business

We challenge participants to be themselves, to dig deep to unlock their authenticity. Our decades of research and experience tells us that people become the happiest and most productive in a work environment when they are relaxed, calm and feeling good about themselves and the condition of their life. During our training, it will become obvious that most of our personal problems start with not keeping the agreements that we give to ourselves. Much of employee challenge is a function of broken agreements - not keeping their word, or someone else not keeping theirs.

We teach employees to take advantage of the most useful forces we have available to us which are will power, mental toughness, desire, momentum, discipline and staying power.

- ✓ A way of observing and confronting their own perspective, contexts and point of views.
- ✓ A way to remove the repressed emotions and feelings that hold people back.
- ✓ I will ask them to re-examine their reflex patterns of living that kept their lives from working.
- ✓ We will uncover that people do not need to be stuck with their automatic ways of being but can instead be free to choose their ways of being in how they live their lives.
- ✓ The important of proper food and exercise and how it relates to your overall state of being. We will look into chemical effects of food and emotions.
- ✓ We will delve into the degradation chart of decision making.
- ✓ We will discuss Dr. David Hawkins map of consciousness.
- ✓ We will understand how to increase your energy by manipulating thoughts.

- ✓ We will spend a lot of time on thinking, as thinking is mindset and great mindset makes champions.
- ✓ We will study relationships, customer and family. A happy family person is a happy employee. A happy employee goes home happy.
- ✓ We will study investing in yourself and the profound effect this has on overall quality of life.
- ✓ Our daily habits become who we are. We take an in depth look at daily habits and how critical they are.
- ✓ We will develop resilience by getting out of our comfort zone.
- ✓ We will be rewiring their brains to convert all negative thoughts and energy so they can use that same energy to develop a enhanced person that is happier, more productive, living from creativity and driving both their and your bottom line. This is what we do.

HAPPINESS IS
THE FUEL THAT
FEEDS OUR ENERGY

brucelemo.net

What your employees can expect:

- Increased energy levels
- Calmer more relaxed state of being
- Happier, smiling more
- More creativity and productivity
- A better work/life relationship

Get Yourself a Partner in the People Business Your Business

At BE Seminar Training, we are dedicated to helping you give your employees the experience that will elevate their lives, reveal their greatness to themselves and help them understand themselves. We have built our business around this dedication to service excellence.

Each part of the training becomes real for participants by virtue of experiencing themselves, not concepts derived from someone else's experience.

In the training, the experience of being at the effect of life - of having been put here, and having to suffer the circumstances of life, of being the bearer or victim of life, or at best, of succeeding or winning out over the burdens of life - shifts to an experience of originating life the way it is - creating your experience as you live it - in a space uniquely your own.

In that space, the problems of life take on an entirely different significance. They literally pale, that is, become lighter - or enlightened. One sees, quite sharply, that who one is simply transcends and contextualizes the content with which one has been concerned. The living of life begins to be what counts, the zest or vivacity with which one lives is what matters.

The experience of being yourself is innately satisfying. If who you really are does not give you the experience of health, happiness, love and full self-expression - or 'aliveness' - then that is not who you really are. When you experience yourself as yourself, that experience is innately satisfying.

I mean that people experience being empowered or enabled in that respect. They no longer are their point of view. They have one, and know that the one they have is the one they chose, until now, and that they can, and probably will, choose to create other points of view. They experience the intended result of the training, which is a shift in what orients people's being from the attempt to gain satisfaction - a deficiency orientation - to the expression of satisfaction already being experienced - a sufficiency orientation.

We are just Getting Started **COACHING**

We understand the need for repetition and consistency. These steps need to become daily habits that are “baked in” to create long lasting effects that will continue to pay dividends to your company for years to come. We know that 3 months can make shifts in behaviour and attitudes but more importantly we know that 6 months will cement them. To that end, we will be there for you and your employees after our initial 2-day seminar is over.

No one climbs **MT. EVEREST WITHOUT A SHERPA**

We have helped thousands of people scale the Mt. Everest of their minds. The fact is a lot of people haven't been given the best upbringings and haven't spent a lot of time working on themselves; they need help. This is why BE Seminar Training exists. We have distilled a combined six decades of research and personal experience into our programs. We have done the work for them and now our job is to make sure these qualities are displaced and transplanted as a way of life. I have met zero people who don't yearn to be happy, loving, disciplined, enthusiastic and wealthy. The best way for this is with one-on-one and group training via weekly zoom meetings for 6 months.

We truly care about people and take great pride in shifting people who shift cultures that change games.
